**I. IN THE SPECIFICATION**

3. Please do not enter the specification changes from the November 22, 2006 amendment, instead please make the following changes.

4. In the Related Applications section, of the clean version of the amended specification submitted on March 26, 2003, please add the following:

--A continuation in part of this application entitled, "Handheld Video Transmission and Display," application number 11/262106, was published as US 2006/0114987.--

5. On page 9, change paragraph 6 from

'Figs 14A through 14c shows embodiments of a machine element for variably altering the number of bits.'

to

--Figs 14A through 14C shows embodiments of a machine element for variably altering the number of bits.--

6. On page 13, change the first five lines from

'1430 36-bit to variable bit sub-sampler  
1440 24/36 bit variable bit sub-sampler  
1450 second selector  
1460 selection logic  
1510 decoding circuit'

to the following six lines

--1430 36-bit to variable bit sub-sampler  
1440 24/36 bit variable bit sub-sampler  
1450 second selector  
1460 selection logic  
1470 selection signal  
1510 decoding circuit--
